Processes Under One Roof

100+
Companies Across India

OUR VISION

“To be the preferred packaging partner for all movement of products and components — internally and across borders — by offering well designed, executed and cost-optimal packaging solutions.”

What This Means

Well Designed

In-house design & tool room — concept to finished product.

Well Executed

5 manufacturing processes, 25+ skilled professionals.

Cost Optimal

Reusable solutions and lean processes keep costs down.

Across Borders

Exporting packaging & tools globally including to Middle East.

OUR VALUES

What drives every decision we make

01

Ownership Driven Performance

Every person — from machinist to manager — takes personal accountability for quality, timelines and outcomes.

02

Continuous Learning & Training

Ongoing investment in skills, from technical know-how to financial literacy, keeps our team current and confident.

03

Respect

A culture of dignity for every employee, customer and partner creates loyalty, consistency and long-term results.

CAPACITY & CAPABILITY

Ready to grow with you — right now

30%

Spare Capacity Available Now

3

Months to Full Scale-Up

5

Manufacturing Processes In-House

25+

Skilled Staff Across All Disciplines

30% Capacity Available Now

Our floor runs at 70% utilisation — new orders absorbed immediately without compromising existing commitments.

Full Scale-Up in 3 Months

With our trained workforce pipeline and supplier network, we can ramp output by up to 100% within three months.

PEOPLE FIRST

Our Employee Welfare Programmes

We invest in our people's families — not just their salary.

EDU Education Support

- 50% of school fees for employees' children up to age 18
- 50% of higher education fees up to age 25

Because a child's future shouldn't depend on a parent's pay grade.

TECH Computer Literacy

- Free computer classes via Glocal Training Centre, Sambhajinagar
- Open to employees' children & extended families, ages 6–18

Bridging the digital divide — one family at a time.

SIP Financial Wellbeing

- Company pays the first three SIP (Systematic Investment Plan) instalments
- Employees introduced to long-term investing fundamentals

Helping our people build wealth — not just wages.

OUR PRODUCTS & SOLUTIONS

01 **Vacuum Forming / Thermoforming**

Automotive · Pharma · Food · Electronics

02 **Blister Packaging**

Custom trays and formed packs

03 **PP Box Manufacturing**

Reusable · eco-friendly · cost-optimal

04 **HIPS / HDPE / PP / ABS Cores**

Film packaging cores for global markets

05 **Injection & Blow Moulding**

Custom plastic parts up to 150g

06 **Foldable Large Containers**

1-tonne rated metal + PP logistics solution

07 **Metal & Plastic Hand Tools**

Screwdrivers, testers, camping & garden tools

PROCESS

Vacuum Forming & Thermoforming

- 7 state-of-art automatic machines
- In-house design & tool room — aluminium dies, 1-week turnaround
- Materials: PET, PVC, HIPS, HDPE, PP
- Pallet-size capacity: 1200mm × 1200mm

THERMOFORMING — SECTORS SERVED

Automotive

Gears, crankshafts, crank pins, bearings, pistons and piston rings — precision trays and blister packs.

Pharma

Storage and transport trays for needles, vials, disposable pens — multiple material options.

Food

Muffin, cupcake, chocolate, ladoo and pan trays. Lunch and snack boxes via blister forming.

Electronics

PCB and cable component packaging in dissipative / anti-static material for ESD protection.

PACKAGING

Blister Packaging

- Pharma: storage & transport trays for vials, needles, pens
- Electronics: anti-static & dissipative trays for PCB components
- Logistic / transport pallet size trays

PACKAGING

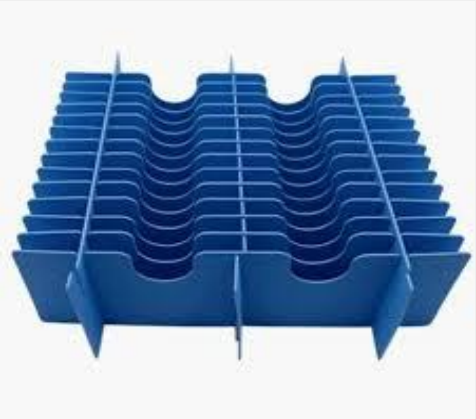

Polypropylene Box (PP)

- Reusable 80+ times — in-house repair extends life further
- Customisable: size, thickness, strength and colour
- Cost per component: ₹3.50 (corrugated) → ₹0.60 (PP box)
- Circular solution — reduces waste & packaging cost

EXTRUSION

HIPS / HDPE / PP / ABS Cores

- High-strength pipes for wrinkle-free film winding
- Internal diameter: 2" to 6", wall thickness up to 7mm
- Length fully customisable to order
- Catering to global flexible film market — Middle East focus

MOULDING

Injection & Blow Moulding

- 5 machines, 20–120 tonnes capacity
- Custom plastic parts up to 150 grams
- In-house tool room — quality and timeline guaranteed
- 25+ years of moulding experience

MOULDED PRODUCTS — WHAT WE MAKE

Automotive & Industrial

Spanner racks, allen key boxes, end caps, magnetic trays

Pharma & Furniture

Pharma products, furniture components and housing parts

Camping & Outdoor Tools

Scrapper sets, plastic tent stakes, stake pullers — exported globally

Electronics & Custom Parts

PCB holders, cable management, custom-spec components to 150g

LOGISTICS

Foldable Large Containers (FLC)

- Complete system supports 1 tonne weight
- Metal pallet: 3mm / 4mm / 5mm / 6mm options
- PP sleeve: up to 3000 GSM, with or without partitions
- Fully customisable size, strength and colour

OUR USP –In house Tool Room

Design

Team of 5 + designers with CREO / ProE capability

VMC

Own VMC machine - to ensure minimum possible die turn around time and maintain quality

Tool Room

In house backend – tool room with lathe, drill, DRO machines to ensure all operations are carried out within the company thus maintaining strict control on quality and deadlines

Prototyping & Sampling

Systems for FTR in design and sample development
